

**Use of Facilities and Administrative (indirect cost return)
Funds in Horticulture**

The Department of Horticulture should use funds returned from generation of indirect costs to support its missions in this order of priority:

1. Startup up packages for new hires
2. Support of services provided by the main office
3. Partial support of repairs for infrastructure items used by the Department of Horticulture*
4. Partial support for repairs of capital equipment shared by faculty in the Department*

*Users of these specific infrastructure items or equipment would cover the rest of financial support for repairs

Passed by Department, December 16, 2011
